

The Koyle Relief Mine, located near Spanish Fork in Central Utah, has had a profound effect upon the life and property of thousands of members of the Church of Jesus Christ of Latter-day Saints. Company officials claim that the number of stockholders, past and present, exceeds 7 thousand persons.

Despite the sixty-eight years of its totally unsuccessful operation, the mine continues to maintain a countless number of old believers and to attract a considerable array of new ones. Prompted by a type of religious fervor, these people continue to declare the mine divine and its founder, John H. Koyle, inspired. Basing their faith on the claimed dream, visions, and theophanies of Koyle, they await the coming forth of boundless riches from the mine which will be used to benefit not only themselves, but all of the righteous in the last days.
