

What do the service projects accomplish?

Tuesday, 05 February 2008 14:45

The mine has been shut down for some time now. The result of this has been that some things have begun to deteriorate. The service projects have been an attempt to put things back in good repair. This has included cutting back trees and bushes, cleaning out the mill, which is the concrete building on the side of the mountain, increasing the throughput on the natural springs, pruning the fruit orchards, etc. The stockholders want the buildings, grounds and other resources to be ready for when the time is right for the mine to come in.
